[Lolitashouse Reallola Issue2 V009 \(Lolmag\) \(Hussyfan\) \(Lolitaguy\) \(Lolonly\) \(Knabinoj\) \(Showstars\)](#)

Table 3 Relationship between socioeconomic status and COPD prevalence

References	Population, description, and N	Socioeconomic status measure(s)	Outcome measure(s)	Main findings
Bakke et al ²⁴	Cross-sectional study of general adult population in Norway (N=1,512)	Occupation	Asthma and COPD prevalence	OR of 3.6 for obstructive lung disease in people with high degree of airborne exposure
Eachus et al ²⁵	Adults from 40 general practices in the UK (N=28,080)	Deprivation score based on residence	Disease prevalence including COPD	Emphysema and chronic bronchitis relative index of 2.72 and 2.27, respectively (values higher than most other conditions)
Chen et al ²⁶	National population survey in Canada (N=7,210)	Income	COPD disease prevalence	For low income persons OR =3.7 for males and 2.4 for females
Marmot et al ²⁷	Civil servants in London, UK (N=10,308)	Occupation (employment grade)	Chronic bronchitis prevalence	OR for CB for men 1.44 and women 1.21
Montnemery et al ²⁸	Adults in Sweden (N=12,071)	Occupation, social position, and residence location	Prevalence of CBE and respiratory symptoms	CBE more common in unskilled and semiskilled workers, low social position
Lindberg et al ²⁹	Sweden (N=1,165)	Occupation	COPD incidence over 10 years in subjects with respiratory symptoms	Manual workers had an OR =1.78 vs professionals. Low education level had an OR =1.73
Ellison-Loschmann et al ³⁰	European Community respiratory health Survey in Europe, Australia, New Zealand, and the US	Educational level and occupational class	Prevalence and incidence of chronic bronchitis	Low educational and occupational levels (prevalence ratio =1.9 and 1.8, respectively)
Halvorsen and Matrinussen ³²	Norwegian prescription database of COPD patients (N=62,882)	Educational level and level of unemployment in community	COPD prevalence	Communities with low educational levels and unemployment associated with higher risk of COPD
Karnevisto et al ³³	Finland – national population-wide survey (N=6,525)	Education and household income	COPD and asthma prevalence	Education significant risk factor for COPD, whereas low household income was a risk factor for asthma
Lovasi et al ³⁴	Multi-ethnic study of atherosclerosis at multiple sites in the US (N=3,706)	Education, household income, and wealth indicators	Degree of emphysema on computed tomography scan	Higher percent of emphysema in people with lower high school education, annual income, and wealth
Yin et al ³⁵	People's Republic of China (31 provinces), (N=49,363)	Education and household income	COPD prevalence by self-report	SES predictive of COPD risk independent of smoking and rural vs urban residence
Herrick et al ³⁶	Cross-sectional population study in one US state (N=25,986)	Annual household income and highest level of education	COPD prevalence	COPD prevalence threefold greater between highest and lowest income levels as well as between lowest and highest education levels
Burney et al ⁶⁰	Multicenter (n=22 countries), international study burden of obstructive lung disease (N=15,355)	Poverty as measured by GNI of countries	COPD prevalence	COPD prevalence fivefold greater between highest and lowest income levels as well as between lowest and highest education levels
Kainu et al ³⁷	Finnish population (N=8,000, COPD N=628)	Occupation	COPD prevalence	Prevalence higher in manual than nonmanual occupations
Golec et al ³⁸	Polish farmers (N=64)	Size of farm	COPD prevalence	Lower SES in COPD patients
Hagstad et al ³⁹	Swedish never-smokers with obstructive lung disease (N=967)	Education level, occupation	Proportion of nonsmokers with COPD who had occupational exposures	OR of COPD related to occupation =0.72 in college graduates vs those with less than high-school education
Lee et al ⁴⁰	Korean never smokers with COPD (N=3,473)	Educational level, occupation	COPD prevalence	Low education level and manual labor were risk factors for COPD
Tan et al ⁴¹	Canadian cross-sectional study in general adult population (N=5,176)	Educational level	COPD prevalence in ever and never-smokers	Low education level associated with higher prevalence in both never and ever-smokers

Abbreviations: CB, chronic bronchitis; CBE, chronic bronchitis/emphysema; COPD, chronic obstructive pulmonary disease; GNI, gross national income; OR, odds ratio; SES, socioeconomic status.
